

PSCLIENT VERSION 2012 PROGRAM UPDATES

NOTE: Program build/version numbers and/or dates are not necessarily consecutive.

BUILD #	REL DATE	DESCRIPTION
2012.00	21 Sep 11	"Gold" version released for shipment.
2012.01	28 Nov 11	Reports: Changed the Management Job Gross Margin report so that option prices are extracted from the correct price level: user override, Model Option level, or Master Option level.
2012.05	5 Jan 12	File: Added the ability to use an alternate file dialog/navigation window when opening/saving files because some users were experiencing program problems when they selected an option that called a Windows [®] file dialog window. The option is enabled/disabled by a new checkbox option (Use Prosoft alternate File Dialog control) on the File Supervisor Configuration Additional tab. <i>Windows is a registered trademark of the Microsoft Corporation.</i>
2012.06	23 Jan 12	ToDo, Client: Added an " Explorer " button to the upper right side of the ToDo List Edit Task and to the right of the Client Documents button on the Clients Insert/Change windows (it is not visible unless the File Supervisor Configuration Use Prosoft alternate File Dialog control checkbox is checked). When Explorer is selected, it will launch a Windows [®] File Explorer window with the initial focus being the client documents folder to allow for out-of-program file maintenance (the File Explorer function is completely independent of the program) as necessary. WARNING: Each time the Explorer button is clicked, a new File Explorer window will open. <i>Windows is a registered trademark of the Microsoft Corporation.</i>
