

Job User Access Limitation

Program(s): Eclare Software Report: 3850

File | User Maintenance | Limits

Jobs | Job Maintenance | Insert/Change

Added new User Maintenance "Limits" security tab and Job header field labeled "Limit". If a Limit has been defined in both User Maintenance and the Job header, users will only be allowed access to those jobs with the specified Limit restriction(s).

PO Pack Sort Tabs

Program(s): Eclare Software Report: 3879

Maintenance | Setup Maintenance | PO Pack

Added sort tabs to the PO Pack list to allow it to display in either PO Pack Number or Description order.

Master Item List "Deleted" Flag

Program(s): Eclare Software Report: 3892

Maintenance | Master File

Added a "Deleted" flag to the Master Item list which is used to indicate that an item is no longer current and should not be used. Throughout the program, additional options have been added to allow you to filter out items marked with the new flag.

Delete Multiple Jobs

Program(s): Eclare Software Report: 3893

Maintenance | Global Job Maintenance | Tag Delete Jobs

Added a new menu option which allows you to mark multiple jobs and then delete them all at once.

Bulk Vendor Price Update

Program(s): Eclare Software Report: 3894

Maintenance | Price Update

Added a "Vendor Bulk Update" button to the Vendor Price Update window which allows some or all items for a selected vendor to be tagged. An updated "Mark Up Cost Percent" amount may then be applied to all the tagged items.

Job Takeoff Detail

Program(s): Eclare Software Report: 3998

Jobs | Takeoffs

Added a seven-character user "Reference" field to the takeoff detail window. It can be used as desired, for example, to identify what a given item or assembly is for, as a reminder, a quick reference, and so on. It has also been added to the Takeoff Report as a 'Show on Report' pull-down setup option.

All Programs - "Program Connect" Enhancements

Program(s): PSClient, Eclare, Gemini, Other Software Report: 4030

Help | Check for Updates

File | Backup Company Data | Send to Prosoft

File | Customer Suggestions | Insert/Change | Send to Prosoft

Enhanced the routine(s) which allows users to communicate with our server to download or upload program updates/data/other information via the internet. We also added the capability to send customer suggestions. In order to work, the user computer on which our program is installed must have access to the internet. Internal firewalls and other hardware and/or software protections schemes and programs may interfere with or completely prevent access.

Global Takeoff Maintenance

Program(s): Eclare Software Report: 4040

Maintenance | Global Job Maintenance | Global Takeoff Maintenance

Increased the size (width) of the Description column in the bottom browser of the first window. Also set the window to automatically expand the width of the Description column when the window size is increased horizontally.

Adding / Copying New Items to Master File List

Program(s): Eclare Software Report: 4042

Maintenance | Master File

Added a new "Insert/Copy" button which will allow a highlighted Item/Assembly to be copied to a new Item/Assembly Number. An Item/Assembly cannot be copied to an Item/Assembly Number which already exists.

Auto Sort Takeoff Detail

Program(s): Eclare Software Report: 4047

Jobs | Takeoffs

Added an "Auto Sort" button that will re-sort all the takeoff detail for the currently selected takeoff. Non-Assembly Items will be sorted first followed by Assemblies but detail line order within Assemblies is not changed/sorted.

New Master Item Type

Program(s): Eclare Software Report: 4067

Maintenance | Master File | Insert/Copy/Change

Added a new Master Item List Type option called "Fixed Item". Basically, Fixed Item quantities stay the same throughout the Takeoff and Exchange process. Fixed Items can be used as stand-alone items or as part of an Assembly.

If a Fixed Item is used within an Assembly, its quantity will not be changed if the Assembly header is changed. If an Assembly quantity is set to zero, the status of any Fixed Items within it will automatically be set to Alternate but their quantities will not be changed. Likewise, when a job is retrieved using the Exchange function, a stand-alone Fixed Item's Include/Alternate status may be changed but not it's quantity.

AFE Fax Server Update

Program(s): PSClient, Eclare, Gemini Software Report: 4087

A newer version of the AFE Fax Server program is now included with our programs. It may be launched from either the program CD or, after the program upgrade has been installed, from the program folder.

Vendor Item Number Description Updating

Program(s): Eclare Software Report: 4106

Maintenance | Master File | Change

If the main item number description is changed you can optionally choose to update the vendor level description at the same time.

PSClient/Eclare Model Price Updating

Program(s): PSClient, Eclare Software Report: 4135

Maintenance | Models | Insert/Change

File | Exchange | Retrieve Model Option Costs

Added a new "Eclare Link" field to the Model Maintenance browse window. When exchanging model pricing information with Eclare, the program will use information in the Eclare Link field instead of the PSClient model name.

Eclare Import Vendor Prices

Program(s): Eclare Software Report: 4137

File | Import | Import Vendor Pricing

Added an exception report that will show any errors which occur during Vendor Pricing file import.

User Maintenance Enhancements - All Programs

Program(s): PSClient, Eclare, Gemini Software Report: 4184

Eclare, Gemini, and PSClient: File | User Maintenance | Security

Added a new "User Maint" checkbox to the User Maintenance Security tab and moved the User Maintenance option from under the Supervisor menu to the File menu. When checked, the "User Maint" option allows trusted users access to the User Maintenance area. If a user's security options are changed while that user is logged in, he/she must either exit the program or log out and then log back into that company before the change(s) will take effect.

Units Browser Enhancement

Program(s): Eclare Software Report: 4194

Master File

Enhanced the unit/assembly Units and Unit Conversion lookup functions.

Program Update Installation Enhancement

Program(s): PSClient, Eclare, Gemini, Other Software Report: 4236

Help | Check for Updates

Added user notification when an update has been downloaded from the internet but has not yet been installed. The first time a user with "Administrative" security logs into any company, he/she will be asked if they wish to install the update. If they do wish to install it, they must make sure all users are out of the program before answering "Yes" to the prompt.

Print Envelope

Program(s): PSClient, Eclare, Gemini Software Report: 4243

Eclare: Maintenance | Vendors | Contacts

Gemini: AP | Vendor List Maintenance | Contacts

AR | Customer List Maintenance | Contacts

PR | Employee List Maintenance

PSClient: Scheduling | Maintenance | Vendor List | Contacts

Added an "Envelopes" button to the various programs and menu options noted, above, which will allow single envelopes to be printed on demand. When the "Envelope" button is selected, a "Print Envelope" window will appear with the default "To Address" filled in. It may be edited as desired prior to printing.

When checked, a "Show Detail" checkbox on the Print Envelope window allows the user to either select from a list of pre-defined form/envelope sizes or to define a custom form/envelope. Another checkbox, "Do not print return address", allows printing of the Return Address to be suppressed.
