

Additional Contact Fields Added

Program(s): PSClient, Eclare, Gemini Software Report: 3941
Gemini | Accounts Payable | Vendor List Maintenance | DBA Tab
PS Client -- Clients | Transactions | Client Header
PS Client -- Scheduling | Maintenance | Vendor List
Eclare -- Maintenance | Vendor

Added the ability to select a specific contact on reports and documents Send options when multiple contacts are available.

Company Email Address

Program(s): Eclare, Gemini Software Report: 4206
Gemini -- File | Supervisor | Configuration
Gemini -- File | TxText Maintenance
Gemini -- File | Print Vendors Letters
Eclare -- File | Supervisor | Program Setup
Eclare -- File | TxText Maintenance
Eclare -- File | Print Vendors Letters

Added TxText Maintenance support for printing the company email address on letters and documents in Gemini and Eclare.

Job Takeoff Status Using Job Criteria

Program(s): Eclare Software Report: 4219
Maintenance | Global Job Maintenance | Job Pricing

Added a new Takeoff Criteria box to the Job Pricing report setup window. Four user defined criteria fields provide the ability to set the job takeoff status while repricing. This allows you to more quickly reprice a group of models without having to individually change their criteria.

Vendor Listing Report

Program(s): PSClient, Eclare Software Report: 4257
Eclare -- Reports | Vendor Related | Vendor Listing
PS Client -- Reports | Setup Reports | Master Vendor List

Added report filter options to the Vendor report to, effectively, allow a shorter report. New filter checkbox options are "Show Vendor Full Address", "Show Linked Contacts", and "Show non-Linked Contacts".

Change of Default Color for Alternate Items

Program(s): Eclare Software Report: 4261
Eclare | Takeoff

Changed the default color for alternate items to be blue. It can be re-defined to be whatever color you wish.

Takeoffs Alternate

Program(s): Eclare Software Report: 4321
Jobs | Takeoffs

Added a new "Show Alt" checkbox above the upper right corner of the Takeoff Detail list control whether "Alternate" items are displayed or not.

Send Color Selections

Program(s): PSClient, Eclare Software Report: 4323
Eclare -- Maintenance | Setup Maintenance | Master Product Groups
PS Client -- Reports | Color Selection | Send Color Selections to Vendors

Added a new option that will allow you to "Send" a client's Color Selection information to your vendors. The vendors are determined by schedule task vendor assignments and a new checkbox option in the Product Group called "Send Color Selections."

The new report will use the "Send" functionality within the "Gemini: P.Orders" Vendor Contact information.

Job Header - Plan ID

Program(s): Eclare, Gemini Software Report: 4325

Eclare--Jobs | Job Maintenance

Gemini--JC | Job List Maintenance

Added a new "Plan ID" (model) field to the job header and a new Plan ID tab to the job list browser which sub-sorts jobs by Plan ID. When Eclare creates a new job from a PSClient data exchange, the Plan ID will be set to the PSClient Model name which may be subsequently changed as desired. When Eclare data is exchanged with Gemini, the Plan ID is used as a default in the new Gemini job it creates. It can also be changed as desired.

Email, FAX and FTP Support for TxText Documents

Program(s): PSClient, Eclare, Gemini Software Report: 4349

Eclare -- File | Print Vendor Letters

Gemini -- File | Print Vendor Letters

PS Client -- File | Print Client Letters

Added a new utility to allow users to either EMail, FAX, and/or FTP documents and letters directly from their program. Users will also have the option to print address labels for any letters.

Exchanging Job Information

Program(s): Eclare Software Report: 4362

File | Exchange | Retrieve Jobs

Changed the program to clear the "Current Job" selection when an Exchange is done. This should help reduce the chance that the user might start editing the wrong job after the Exchange operation is completed.

Data Location

Program(s): PSClient, Eclare, Gemini Software Report: 4455

File | Select Data Path

Changed all our programs to allow program and data files to be located separately. However, we still require the program's data structure to remain together. This includes all the DATA### company folders as well as a few of the program's root files--COMPANY.TPS and Gemini's COLINK.TPS files, for example.
