

PROSOFT PSCLIENT V19/2009 POST-RELEASE PROGRAM UPDATES

Notes:

1. See the PSClient_WhatsNew_V19.PDF file for program changes between versions 18 and 19.
2. Program update version numbers are not necessarily consecutive.

Version	Rel Date	Description
19.05	3 Oct 08	Shipping version released (with "as of" release date of 15 October, 2008).
19.06	10 Oct 08	Added new TxText "OptionDetailCustom" token.
19.09	27 Oct 08	1. Added new TxText "TotalOptionsCustom" token.
		2. Corrected length of the "Transaction ToDo Code" to be three characters instead of two.
19.10	5 Nov 08	Changed data conversion logic for building of database key files.
19.11	6 Nov 08	Corrected report handling logic for longer ToDo code.
19.12	12 Nov 08	1. Changed new Client Schedule Task sync handling logic in Client Maintenance .
		2. Added new TxText "ClientID" token.
19.13	4 Dec 08	1. Corrected Labels printing routine to use selected printer rather than the current default printer.
	16 Feb 09	2. FAX Manager: Added supervisor/"Administrative" user ability to use 'Delete' for "Processing" FAXes that are hung up.
19.14	25 Feb 09	Corrected the ToDo browser list refresh logic to prevent individual line entries from showing twice.
19.15	25 Feb 09	1. Added new TxText "ColorAddendOptRef" token which will print if the new Print Contract "Include Color Token" option is checked when printing addendums.
		2. Added a new "Note" button to the Master Option List "Option Type: Color Choices (std)" to properly show related notes.
19.16	4 Mar 09	Corrected a problem in TxText which prevented easy editing of Header and Footer text after saving a document.
19.17	24 Apr 09	Maintenance Color Choice: Corrected logic to allow for restricted access to Master Color Maintenance by users who don't have normal security for this list.
19.18	1 May 09	Clients Change Model Options Color Choice Select Colors: Fixed color table selection routing for 255th and higher color selections.
19.19	2 Jul 09	<u>Web Server version only</u> - 1. Corrected logic to prevent the web browser from timing out when waiting for a purchase order printed through the web interface to complete.
		2. Enabled logging to be saved to disk. Logs are created in a folder named "Log" located within the same folder as the PSC_Web.exe program.
